to every demand of yours

### About us:

“Bournas Medicals” is a modern **Greek** company, operating since 1988 in the production and trade of **medical disposable products** and **health supplies**. A **leader** company with **productive** and **import** activity, while it has a dynamic presence with active **export activity** in more than **50 countries worldwide**.

With our extensive catalogue of certified products, we provide complete solutions covering the needs of every business or corporate entity that trades and distributes medical and health consumables. Thus, indirectly but effectively we support the services of various sectors:

- Medical and hospital care
- Health and safety
- Beauty and wellness.

### Our Vision:

We **inspire** companies related to our products all **around the world**. We are the **No. 1 choice** for the wholesaler of health supplies.

### Our Mission:

We **support** the modern wholesale **business** as **one stop point** for the **supplies of medical and health disposable products**.

### Our Goals:

- To **provide products** that **meet** the **strictest criteria** and **certifications**.
- To **adjust our pricing policy** and **catalogue** in a way **that ensures the increase of sales for our customers**.
- The creation of **certified affordable** medical consumables, through our own brand label (“**SOFTCARE**”), based on the needs and trends of the markets we operate.
- The continuous **expansion** of our **catalogue** with new products & options.
- To support our **B2B** network of **customers worldwide**, with high level after-sales services and training for our products.

# Aurelia Vintage

## Latex Examination / Protection Gloves

Strength, comfort, dexterity, and sensitivity

- Natural rubber latex
- Powdered
- Ambidextrous
- Beaded cuff
- Smooth finish
- Comply with Medical Devices Regulation (EU) 2017/745\*
- Certified for food contact\*

\*Consult Instructions for use 

 **Caution:** Components used in making gloves may cause allergic reactions in some users, including anaphylactic responses. In case of such reaction discontinue use and consult your physician.

Sold only in the  
Greek territory

### Suggested use

-  MEDICAL
-  LABORATORY
-  BEAUTY
-  DENTAL
-  HEALTHCARE & NURSING

Suitable for food  
handling excluding  
acidic foodstuffs

Aurelia Vibrant

Latex Examination / Protection Gloves

Strength, comfort, dexterity, and sensitivity

- Natural rubber latex
- Powder free
- Ambidextrous
- Beaded cuff
- Smooth finish
- Comply with Medical Devices Regulation (EU) 2017/745\*
- Certified for food contact\*

\*Consult Instructions for use

**Caution:** Components used in making gloves may cause allergic reactions in some users, including anaphylactic responses. In case of such reaction discontinue use and consult your physician.

Sold only in the Greek territory

Suggested use

- MEDICAL
- LABORATORY
- BEAUTY
- DENTAL
- HEALTHCARE & NURSING
- PHARMACEUTICAL INDUSTRIES
- TATTOO

LATEX

NON STERILE

1.5 AQL

Suitable for food handling excluding acidic foodstuffs

# SOFTcare SURGICAL

## Latex Surgical Gloves

Perfect fit, comfort and tactile sensitivity

- Natural rubber latex
- Powdered and Powder Free option
- Sterile
- Anatomic
- In pairs (Left and Right)
- Individually packed per pair
- Beaded cuff
- Finger textured and Palm micro textured
- Comply with Medical Devices Regulation (EU) 2017/745\*

\*Consult Instructions for use

**Caution:** Components used in making gloves may cause allergic reactions in some users, including anaphylactic responses. In case of such reaction discontinue use and consult your physician.

### Suggested use

- MEDICAL
- DENTAL

SOFTcare SOLD

Disposable nitrile protection gloves  
Strength and comfort in every single grip

- Heavy Duty nitrile synthetic rubber
- Powder free
- Latex free
- Ambidextrous
- Beaded cuff
- Rough textured
- Extra strong
- Comply with  
Personal Protective Equipment Regulation (EU) PPER  
2016/425 Category III\*

\*Consult Instructions for use 

 **Caution:** Components used in making gloves may cause allergic reactions in some users, including anaphylactic responses. In case of such reaction discontinue use and consult your physician.

Suggested use

-  MEDICAL
-  LABORATORY
-  IT
-  TATTOO
-  HEALTHCARE & NURSING
-  INDUSTRY
-  CAR WORKSHOPS
-  HOTEL RESTAURANT CAFÉ

## Nitrile Disposable Gloves

Superior performance, maximum safety

- Heavy Duty nitrile synthetic rubber
- Powder free
- Latex free
- Ambidextrous
- Beaded cuff
- Full textured
- Comply with Medical Devices Regulation (EU) 2017/745\*
- Comply with Personal Protection Equipment Regulation 2016/425\*
- Certified for protection against specific chemicals\*
- Certified for protection against viruses, bacteria & fungi\*
- Certified for food contact\*

\*Consult Instructions for use

**Caution:** Components used in making gloves may cause allergic reactions in some users, including anaphylactic responses. In case of such reaction discontinue use and consult your physician.

### Suggested use

- MEDICAL
- LABORATORY
- TATTOO
- IT
- HEALTHCARE & NURSING
- INDUSTRY
- CAR WORKSHOPS
- HOTEL RESTAURANT CAFÉ

SOFTcare VIVID

Nitrile Examination Gloves

Versatility, colour and premium tactile sensitivity

- Nitrile synthetic rubber
- Powder free
- Latex free
- Ambidextrous
- Beaded cuff
- Finger textured
- Comply with Medical Devices Regulation (EU) 2017/745\*
- Certification for food contact\*

\*Consult Instructions for use

**Caution:** Components used in making gloves may cause allergic reactions in some users, including anaphylactic responses. In case of such reaction discontinue use and consult your physician.

Suggested use

- MEDICAL
- LABORATORY
- BEAUTY
- DENTAL
- HOTEL RESTAURANT CAFÉ
- HEALTHCARE & NURSING
- INDUSTRY
- IT
- TATTOO
- HOME USE

Suitable for food handling, excluding acidic foodstuffs

# SOFTcare FINE

## Nitrile Disposable Gloves

Nitrile for everyday use

- Nitrile synthetic rubber
- Powder free
- Latex free
- Ambidextrous
- Beaded cuff
- Finger textured
- Comply with Personal Protection Equipment Regulation 2016/425\*
- Certification for food contact\*

\*Consult Instructions for use 

 **Caution:** Components used in making gloves may cause allergic reactions in some users, including anaphylactic responses. In case of such reaction discontinue use and consult your physician.

### Suggested use

-  HOTEL RESTAURANT CAFÉ
-  BEAUTY
-  IT
-  HOME USE
-  CLEANING
-  TATTOO

Medical Device Class I  
Personal Protection Equipment Category III

EN 455  
part 1, 2, 3, 4

EN ISO 374-1:2016 TYPE B

Suitable for food handling, excluding acidic foodstuffs

Aurelia Ignite

Nitrile Examination / Protection Gloves

Industrial all-day durability and high puncture-resistance

- Heavy duty nitrile synthetic rubber
- Powder free
- Latex free
- Ambidextrous
- Beaded cuff
- Palm and finger special textured for maximum grip
- Comply with Medical Devices Regulation (EU) 2017/745\*
- Comply with Personal Protection Equipment Regulation 2016/425\*
- Certified for protection against specific chemicals\*
- Certified for protection against viruses, bacteria & fungi\*
- Certified for food contact\*

\*Consult Instructions for use

**Caution:** Components used in making gloves may cause allergic reactions in some users, including anaphylactic responses. In case of such reaction discontinue use and consult your physician.

Sold only in the Greek territory

Suggested use

- MEDICAL
- LABORATORY
- IT
- TATTOO
- HEALTHCARE & NURSING
- INDUSTRY
- CAR WORKSHOPS
- HOTEL RESTAURANT CAFÉ

This product is suitable for  
food handling excluding  
fatty foodstuffs

SOFTcare SKY & FORTE

Vinyl Examination Gloves  
Your powerful and silky touch

- PVC (Polyvinyl chloride) and DONP plasticizer
- Powdered
- Ambidextrous
- Beaded cuff
- Smooth finish
- Comply with Medical Devices Regulation (EU) 2017/745\*
- Certified for food contact\*

\*Consult Instructions for use 

 **Caution:** Components used in making gloves may cause allergic reactions in some users, including anaphylactic responses. In case of such reaction discontinue use and consult your physician.

Suggested use

-  MEDICAL
-  LABORATORY
-  INDUSTRY
-  TATTOO
-  HOTEL RESTAURANT CAFÉ
-  HEALTHCARE & NURSING
-  PHARMACEUTICAL INDUSTRIES
-  BEAUTY
-  HOME USE

 SMOOTH FINGERS

 This product is suitable for food handling excluding fatty foodstuffs

# SOFTcare CRYSTAL

## Polyethylene Disposable Gloves

Handy and affordable for everyday use

- HDPE Clear
- Powder free
- Latex free
- Ambidextrous
- Embossed
- Certified for food contact\*

\*Consult Instructions for use 

 **Caution:** Components used in making gloves may cause allergic reactions in some users, including anaphylactic responses. In case of such reaction discontinue use and consult your physician.

### Suggested use

-  **HOTEL RESTAURANT CAFÉ**
-  **CLEANING**
-  **HOME USE**

## USEFUL INFO WHEN BUYING GLOVES

### USEFUL INFORMATION ABOUT DISPOSABLE GLOVES

The gloves we sell, according to their use and the European Union's, legislation can be classified into two main categories:

#### **A. MD: Medical devices**

##### **Relevant Laws:**

EU Regulation MDR 2017/745

EU Directive MDD 93/42/EEC

#### **B. PPE: Personal protective equipment**

EU Regulation 2016/425

A glove can at the same time may carry certifications that cover the requirements set by law both for use as a Medical Device and as a Personal Protective Equipment.

#### **DISCLAIMER**

The information contained in this catalogue is intended for guidance only and whilst the information is provided in utmost good faith and has been based on the best information currently available, is to be relied upon at the user's own risk. **Bournas Medicals** will not accept any direct or indirect liability deriving from it. No representations or warranties are made with regards to its completeness or accuracy and no liability will be accepted for damages of any nature whatsoever resulting from the use of or reliance on the information. Each company based on its own decision-making process may decide to use the guidance in full, partially or not, as it suits its needs.

## Choosing the proper glove

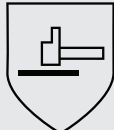

To choose the proper glove, proper questions should be made that will lead to the best choice according to the needs and any other particularities the user may have.

| Question                                                                                                   | Answer                                                                                                                                                                                               | Characteristics to consider                                                                                                                                                                                                                                                                                                              |

|    | The letters 'CE' (Conformité Européenne) appear on many products traded on the extended single market in the European Economic Area (EEA). They signify that these products have been assessed to meet high safety, health, and environmental protection requirements.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                         |                   |                               |         |        |         |       |         |       |  |
|    | "0000" is accompanied by a four-digit identification number of the Notified Body that is responsible for the quality control follow-up testing of the gloves or for monitoring their production. The pictograms and the performance levels are explained in the user instructions supplied with the gloves.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                         |                   |                               |         |        |         |       |         |       |  |
|    | <b>Acceptable quality level unit</b><br>Penetration: A glove shall not leak when tested with an air and water leak test and shall be tested and inspected in compliance with the <b>acceptable quality level</b> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <table><tr><th>PERFORMANCE LEVEL</th><th>ACCEPTABLE QUALITY LEVEL UNIT</th></tr><tr><td>Level 3</td><td>&lt; 0.65</td></tr><tr><td>Level 2</td><td>&lt; 1.5</td></tr><tr><td>Level 1</td><td>&lt; 1.0</td></tr></table> | PERFORMANCE LEVEL | ACCEPTABLE QUALITY LEVEL UNIT | Level 3 | < 0.65 | Level 2 | < 1.5 | Level 1 | < 1.0 |  |

|  | <b>Medical Device*</b><br>Any instrument, apparatus, appliance, software, implant, reagent, material or other article intended by the manufacturer to be used, alone or in combination, for human beings for one or more of the following specific medical purposes:<br>— diagnosis, prevention, monitoring, prediction, prognosis, treatment or alleviation of disease,<br>— diagnosis, monitoring, treatment, alleviation of, or compensation for, an injury or disability,<br>— investigation, replacement or modification of the anatomy or of a physiological or pathological process or state,<br>— providing information by means of in vitro examination of specimens derived from the human body, including organ, blood and tissue donations, and which does not achieve its principal intended action by pharmacological, immunological or metabolic means, in or on the human body, but which may be assisted in its function by such means.<br>Taking into account the intended purpose and their inherent risks the devices are divided into the following classes:<br><b>Class I:</b> Lowest risk. All non-invasive devices, unless one of the rules of MDR 2017/745 implies differently.<br><b>Class Is:</b> All non-invasive Class I devices that must be presented sterile.<br><b>Requires the involvement of a notified body.</b><br><b>Class Ila:</b> Medium risk. Requires the involvement of a notified body.<br>All non-invasive devices intended for channeling or storing blood, body liquids, cells or tissues, liquids or gases for the purpose of eventual infusion, administration or introduction into the body.<br><b>Class Ilb:</b> Medium to high risk. Requires the involvement of a notified body.<br><b>Class III:</b> High risk. Requires the involvement of a notified body<br>Invasive devices subject to the most stringent requirements, including clinical evaluation of the device.<br><i>*For more details please consult EU MDR 2017/745.</i> |                                                                                                                                                                                                                         |                   |                               |         |        |         |       |         |       |  |
|  | The European standard measuring the quality and strength of gloves used in the medical industry. Gloves pass four separate tests before they're considered safe to be used for medical practice. These are:<br><ul style="list-style-type: none"><li>• <b>Part 1:</b> Requirements and testing of gloves for freedom from holes.</li><li>• <b>Part 2:</b> Requirements and tests for physical properties</li><li>• <b>Part 3:</b> Requirements and tests for biological evaluation</li><li>• <b>Part 4:</b> Requirements and testing for shelf-life determination.</li></ul> Each test ensures your gloves act as a barrier against micro-organisms, perform effectively without breaking and protect you against hazardous material in the workplace.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                         |                   |                               |         |        |         |       |         |       |  |

| EN 21420: 2020                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                   | EN ISO 21420: 2020 is a revision of the EN 420: 2003+A1: 2009. It is applicable and required for all PPE gloves. It defines the general rules for: comfort, innocuousness, marking, packaging and user notice.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                         |            |           |                        |                         |           |                |                      |                         |                |                   |                   |                    |                   |                 |                   |  |                     |             |                          |  |

## General Properties Of Gloves Materials

This table includes general indicative properties of each glove material.  
It's purpose is to provide a general image of each material's profile.

**The properties are only indicative and can only be confirmed from the relevant certifications, pictograms and instructions for use accompanying each product.**

| Material             | Strengths                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Weaknesses                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
